PROFILE STATEMENT

Computer Science student with a foundation in Java and C++. Experienced in developing Java programs using interfaces, classes, methods, and arrays to solve practical problems. Problem-solving, communication, organization, and teamwork skills developed through academic projects, teaching, and volunteer experience. Seeking a Computer Science internship to apply programming skills and gain professional software development experience.

EDUCATION

University of Washington Tacoma — Anticipated Graduation: June 2028
Bachelor of Science in Computer Science and Systems — Tacoma, WA

Tacoma Community College — Graduation: August 2026
Associate Degree in Computer Science — Tacoma, WA

EXPERIENCE

Piano & Flute Instructor

- Taught piano and flute to children with entry level of musical experience.
- Prepared lessons based on students' individual abilities and progress.
- Explained new concepts and provided feedback to help students improve.

VOLUNTEER EXPERIENCE

Church Volunteer — Youth Services

Created presentation slides for youth services.

- Organized visual materials to support presentations and communicate information clearly.
- Collaborated with church members to prepare materials for youth events and services.

PROJECTS

Bookstore | Java

- Developed a Java program that implements a bookstore, including the calculation of the total order cost with or without membership.
- Implemented the cart, plain item class, and bulk item class.
- Used an abstract class, interface, tests and methods to organize program functionality and perform calculations.

Warehouse Management Simulator | Java

- Developed a Java program that simulates warehouse operations, including receiving and shipping items.
- Implemented classes and methods to organize warehouse operations and manage inventory.
- Used arrays to track items and enforce individual item limits and overall warehouse capacity.
